This certificate verifies that you participated in the COIL Design Thinking and Doing Workshop
organized by University of Applied Sciences Schmalkalden (SUAS) in Germany, Universidad Siglo 21 in Argentina, and the University Lagos in Nigeria.

Facilitators:

Rodrigo Martinez Goyena, MBA - Universidad Siglo 21 Dr. Ayodele Shittu - University of Lagos Catharina Wassink, MBA - University of Applied Sciences Schmalkalden

(About the Program)

The Design Thinking Intercontinental COIL Program is an innovative learning experience that brings together students and educators from America, Africa, and Europe to co-create meaningful solutions to real-world challenges. Powered by Projekt ProTELC – Pro Thuringian Life Cycle, this program transcends borders to foster creativity, empathy, and collaboration across cultures and disciplines. Originally focused on MINT (Mathematics, Informatics, Natural Sciences, and Technology), the program now welcomes students from all fields—uniting diverse backgrounds in a shared mission of human-centered innovation. Through the Design Thinking process—empathy, ideation, prototyping, and testing—participants develop not only creative solutions but also essential professional and intercultural skills for the future of work.

Learning Objectives

- Master Design Thinking Principles: Understand and apply key phases of the process to create meaningful, user-centered innovations.
- Enhance Intercultural Competence: Communicate effectively across diverse cultural and linguistic backgrounds.
- Cultivate Professional Skills: Develop abilities in client interaction, strategic communication, and virtual teamwork.
- Expand Global Networking and Perspectives: Build international connections and broaden your cultural and professional horizons.

Program Highlights

- Cross-continental team collaboration (America, Africa, Europe)
- Interactive online learning and peer exchange
- Culturally diverse project development
- Pitching ideas with impact and clarity
- A supportive, global learning community

This certificate recognizes not only project completion, but also a commitment to global thinking, empathy-driven design, and intercultural collaboration, key qualifications for success in today's interconnected world.
